## Sensors (optional)

- Specially designed sensors for home use only, and with the emphases on safety, Autoslide has developed the state of the art infrared laser sensor. This sensor helps to prevent the closing of the door on objects or persons in the area of the opening when the door is closing.

- This sensor also acts as a pet sensor by a simple setting change.

### NOTES:

Existing door must be free running with minimal friction and no obstructions.  
Existing lock latching must be disengaged while Autoslide is in operation.  
When fitting to an existing fly screen, floor mounting installation only to be used.

## WHAT A GREAT IDEA!

**AUTOSLIDE™**

**THE AUTOMATIC SLIDING DOOR SYSTEM**  
NO NEED FOR PET DOORS!

### Great for pet owners

No need for pet doors, the Autoslide eliminates the need for a designated Pet door. Your pets can come and go freely without any human assistance. With "pet mode" and additional Pet sensors, you can program Autoslide opening specifically to your pet's size.

The perfect add on to convert your existing sliding door into a fully automatic sliding door

[www.autoslide.com.au](http://www.autoslide.com.au)

# A convenience to some

# A necessity to others

Available in Black or White

## Autoslide

Autoslide is an automatic sliding door system which is attached to existing manual free running patio, internal and sliding screen doors, to enable the door to open and close automatically. No more pushing or pulling of the doors.

## How does it work?

Autoslide is a compact D.I.Y. system designed to automate patio sliding doors. The system consists of a motor device, electronic controller and low voltage DC power supply encased in an aluminium slim line housing. The door is then activated by specially designed wall mounted wireless push button, installed on both sides of the opening. (Infrared sensors are available as an optional extra).

## Affordable to all

### Great for pet owners

No need for pet doors, the Autoslide eliminates the need for a designated pet door. Your pets can come and go freely without any human assistance, with "Pet Mode" and additional Pet Sensors, you can program Autoslide opening specifically to your pets size.

- ✓ 5 star energy rating
- ✓ Save on air conditioning costs
- ✓ Great for hygiene
- ✓ Keep flies and insects out

### Sliding screen door

Autoslide fits to almost all sliding screen door, no more flies and mosquitoes entering or kids leaving the screen door open.

### Easy access for disabled and elderly

Autoslide improves access for disabled. Family loved ones who live in independent or assisted living. Accessibility for all.

### Internal sliding door

Autoslide System will fit to most existing or new manual internal sliding doors. From the garage into the house, or internal doors for ensuites. Great for better hygiene applications.

### Patio sliding door

Autoslide provides easy access for anyone carrying an armful of goods or entertainment supplies in and out of your home.
